

PROJECT INFORMATION

Key Topics

Fire

Highland Council has approved a Detailed Battery Safety Management Plan submitted and the Emergency Response Plan provided, to comply with established codes of practice governed by the Health and Safety Executive and managed by the Scottish Fire and Rescue Service.

Water

SEPA has issued a licence requiring construction practices meet stated water management measures throughout construction and delivery into operation.

Peat

Highland Council has overseen and together with SEPA, we have defined the methods and location for the lifting and repositing of peat within areas of the site to preserve condition and quality of the peat.

HMP

SEPA and Scottish Forestry have supported the project together, defining habitat management proposals and long-term habitat creation and biodiversity planting plans.

Traffic

Through collaboration with the transport teams across Highland Council, a road bond is established to ensure the condition of road quality on the project transport route is preserved.
